EXPERIENCE

WCTS Radio

Operations Manager

PLYMOUTH, MN

Jun 2024 – Present

Lead daily operations for the seminary's radio station – keeping automation systems, broadcast equipment, and digital archives running reliably.

Built **FTP and file-sync automation** for program scheduling that removed a recurring manual step and reduced broadcast disruptions.

Directing and producing a cinematic documentary for WCTS's 60th anniversary, using **AI-assisted workflows** for interview management and narrative development.

BJU Press · Studio Services

Studio Technical Support Manager

GREENVILLE, SC

2023 – Jun 2024

Managed technical operations across multiple production studios – equipment maintenance, system upgrades, and workflow optimization.

Authored technical specs and design recommendations for a **full studio renovation**, and oversaw the rollout of new production technologies.

Lead Motion Graphics Artist ↑ promoted from Specialist

2022 – 2023

Promoted to Lead within months for technical skill and willingness to innovate; earned the company's **Rookie of the Year** award.

Created 3D animations in Blender and partnered with management on promotional videos for the 2023 textbook line.

Maintained NAS infrastructure and established the team's digital archiving protocols.

International School of Wuxi

IT Support Engineer · Contract

WUXI, CHINA

2021 – 2022

Provided technical support for faculty and staff – troubleshooting computers, devices, and classroom technology, and coordinating system upgrades with leadership.

Harvest Family Radio

Radio Production Assistant

GUAM

2016 – 2021

Recorded, edited, and produced daily broadcast audio – sermons, weather updates, and a daily verse commentary.

Operated and mastered the station manager's **smart-playlist automation** for program-loading and scheduling – keeping aired content fresh and continuous, and later carrying that system knowledge into my role at WCTS Radio.

Built the station's **FCC and SoundExchange compliance reporting from scratch** – designing a log-search and reporting system in Excel for accurate, program-by-program filings.

PROFILE

Operations and media-technology specialist with **7+ years** bridging creative production and the technical systems behind it – fluent with the creative teams I support, and relentless about engineering away the manual work that slows them down.

PROFICIENCIES

AUTOMATION & TECHNICAL

Broadcast automation & scheduling · workflow automation via custom scripting · AI-assisted development & process optimization · advanced Excel reporting systems · studio equipment configuration · NAS & digital asset management.

WEB & DEVELOPMENT

HTML / CSS (intermediate) · WordPress · Wix · AI-assisted building of websites, tools, and specialized media applications.

MEDIA PRODUCTION

Adobe Creative Cloud – Premiere Pro, After Effects, Photoshop, Illustrator, Audition · broadcast & podcast audio engineering · Blender (3D modeling, sculpting, animation).

EDUCATION

B.A. in Humanities

Maranatha Baptist University · 2012–2016

Emphasis in cross-cultural communications; minor in digital media communications.

Certifications

CompTIA A+ · 2021
AACS Professional Certificate, Educator (Computer & Information Technology).
